

Holding Tank

Reliable Reservoir

National Construction Rentals' holding tanks provide a reliable waste-water solution when job site trailers are on the premises. Made of **high-quality, impact-resistant** polyethylene, National Construction Rentals' holding tanks provide years of outstanding performance regardless of climate, terrain or overall site conditions.

Constructed with **internal pillars and reinforced corners**, National's holding tanks will stand up to the rigors of sliding, dragging and most rough-and-tumble environments. All fittings are molded in place and all connections and ports are set back to guard against the wear and tear of daily use and months of being in the elements. Further, our holding tanks are designed to be connected concurrently so adding more units is a breeze. Translucent in color, each tank is designed to do its job with as little oversight as possible so you can focus on your job at hand. Call it peace of mind. Call it National Construction Rentals.
